THIS IS UNEVALUATED INFORMATION

- Several radio stations were observed in and near the barracks installation on Zaderastrasse near Plauen-Oberneundorf (M 51/K 12). *
- A radio truck with three antenna-like devices was previously observed in the yard of the barracks installation which quarters a signal unit. This and another radio truck were lighted during the night of 12 September 1950. The observation platform on top of one of the barracks buildings was occupied by two guards during the same day and night. The two radio stations located outside the billeting area were guarded by patrols. The soldiers observed at the radio stations and in the billeting area were army personnel, most of them wearing red-bordered black epaulets. Two air force soldiers were noticed among them for the first time on 13 September 1950. **

* Comment. For location sketch see Annex 1. For side-view sketches see Annex 2.

** Comment. The radio installations probably belong to the signal unit of the First Gds Mecz Army which moved into the billeting area in the spring of 1950. The set-up of the various radio stations does not allow any definite conclusions as to their use. However, it is assumed that a radio monitoring station may be concerned. This would also account for the presence of the two air force soldiers.
